

OUTSKILL // FOUNDATIONS

The AI Generalist Playbook.

Your launchpad into Generative AI — distilled from Session 1. Foundational concepts, the prompt engineering toolkit, model intelligence, and the full prompt library you'll keep coming back to.

— WELCOME

You just laid the foundation.

Congratulations on completing Session 1 of the OutSkill Generative AI Mastermind. Think of today as the ground floor of a skyscraper. We've laid the essentials — understanding the AI revolution, defining your future as an AI Generalist, and mastering the core mechanics of interacting with AI.

Use this guide to consolidate what you learned, lock in the prompt patterns, and keep your AI tool stack at your fingertips. Everything from here builds on this.

— INSIDE THIS GUIDE

01	The AI Revolution & The Future of Work	P. 03
02	The Rise of the AI Generalist	P. 04
03	Your Mastermind Roadmap — 5 Levels to Mastery	P. 05
04	Core Skill — Mastering Prompt Engineering	P. 06
05	Core Skill — The AI Toolkit (Models & Tools)	P. 07
06	Curated AI Tool Stack — Session 1	P. 09
07	The Prompt Library — Every Prompt from Session 1	P. 10
08	Master Tool Index & Links	P. 16

— PART 01

The AI revolution & the **future of work.**

We're in the middle of a profound shift driven by two distinct forms of artificial intelligence. Understanding both is the entry ticket to everything else.

CREATIVE ENGINE**Generative AI**

AI that focuses on generating new, original content — text, code, complex data analysis. Your co-creator. A powerful tool for brainstorming, drafting, and producing at speed.

THE EXECUTOR**Agentic AI**

The next evolution. Autonomously understands a goal, devises a plan, and executes a series of tasks. Less “tool,” more proactive collaborator — moving AI from assisting to **accomplishing**.

This wave is reshaping every job market.

The narrative isn't about **human replacement** — it's about **human augmentation**. The professionals who thrive are the ones who learn to leverage AI as a partner that amplifies their intelligence, creativity, and efficiency.

THE MINDSET SHIFT**From competing with AI to compounding with it.**

The fastest-growing roles aren't the ones AI can do — they're the ones that **orchestrate AI**. Stop asking “will AI replace me?” and start asking “what can I now do that I couldn't do before?”

— PART 02

The rise of the **AI Generalist**.

In an AI-first world, the most valuable role isn't the siloed specialist — it's the versatile **AI Generalist**. A full-stack problem solver who bridges AI's technical potential with real-world business value.

The four traits that define them

Broad AI Model Knowledge

Deep familiarity with the landscape of AI models and their unique capabilities — knowing what each tool is genuinely good at.

Strategic Application

The ability to discern which AI tool is best suited for a specific task — maximizing both efficiency and quality of output.

Solution-Oriented Mindset

A relentless focus on building tangible solutions and driving measurable results with AI — not just experimenting.

Cross-Disciplinary Expertise

A solid working understanding across Data, Technology, Product, Design, Marketing, and Management — the connective tissue of modern business.

IN ONE SENTENCE

AI Generalists turn AI capability into business outcomes.

They're the essential link between what AI **can do** and what your business **actually needs**. The next pages show you exactly how to become one.

— PART 03

Your roadmap to **AI Generalist**.

The Mastermind is structured as a five-level transformation. Each level compounds on the last. Here's where you are — and where you're going.

1

SESSION 1 — YOU ARE HERE

NOW

The Foundations

Communicate effectively with AI through expert prompting. Build your personal toolkit of high-utility AI applications.

2

UP NEXT

The Workflow Architect

Go beyond single commands. Design sophisticated prompting systems and chain multiple tools into automated, multi-step workflows.

3

COMING SOON

The Creator's Playground

Dive deep into multimodal generative AI. Apply AI to creative and content-generation tasks across text, image, audio, and video.

4

COMING SOON

The Agent Builder

Make the leap from **using** AI to **managing** AI. Build, deploy, and oversee autonomous agents that amplify your efficiency by orders of magnitude.

5

THE CAPSTONE

The Vibe Coder

Bring it all together. Use no-code platforms fused with AI to architect and launch full-stack solutions for real-world business problems — without writing code.

— PART 04 — CORE SKILL

Mastering **prompt engineering**.

The quality of your AI output is a direct reflection of your input. A meticulously structured prompt is the key that unlocks high-quality, relevant results — every single time.

The Magic Prompt Formula

Four parts. Always in this order. Use it for any non-trivial AI task.

01 — CONTEXT / ROLE

Define the AI's persona

Anchor its expertise and tone before you ask anything.

```
"You are a seasoned marketing strategist specializing in B2B SaaS."
```

02 — TASK

State your objective clearly

One sentence. What exactly do you want done?

```
"Develop a three-month content marketing plan."
```

03 — INSTRUCTION

Detail the constraints

Format, length, audience, points to cover, things to avoid.

```
"Output as a table. Target CMOs. Exclude paid ad strategies."
```

04 — DATA

Supply the context

Competitor analysis, product details, customer feedback — the raw material the AI needs.

```
"Use the attached customer interview transcripts as input."
```

Advanced Prompting Techniques

ZERO-SHOT A direct request without prior examples. Fast, but riskier on novel tasks.

FEW-SHOT Provide a handful of input/output examples to guide the AI's response format.

CHAIN-OF-THOUGHT Ask the model to **"think step-by-step"** — dramatically improves reasoning on complex problems.

SELF-REFINE Instruct the model to review and improve its own response based on specific criteria.

— PART 05 — CORE SKILL

The AI toolkit — models & tools.

A skilled AI Generalist knows their tools inside and out. Start with how the underlying intelligence works — then learn the landscape of who's building it.

How Large Language Models work — a quick recap

1 Tokenization

Your prompt is broken down into smaller units called tokens — roughly word-fragments.

2 Embeddings

Each token is converted into a numerical representation that captures its meaning in high-dimensional space.

3 Self-Attention (the “Transformer”)

The model identifies and prioritizes the most important parts of your prompt to understand the core context.

4 Prediction

Using its vast training, the model predicts the most probable next token in the sequence.

5 Response Generation

It strings these predictions together — token by token — into a complete, coherent response.

Common AI Assistants & Their Models

● **ChatGPT**

OPENAI

GPT-5.5

● **Gemini**

GOOGLE

Gemini 3.1 Pro

● **Claude**

ANTHROPIC

Claude Opus 4.7

● **Meta AI**

META

Muse Spark

● **Copilot**

MICROSOFT

GPT-5.5 (multi-model)

● **Grok**

XAI

Grok 4.3

— REASONING MODELS

When you need deep logic — go here.

For tasks requiring deep logic and problem-solving, these models are your go-to. They reason step-by-step rather than pattern-matching.

O	OPENAI	GPT-5.5 Thinking	Complex math, science, and coding — frontier reasoning.
G	GOOGLE	Gemini 3 Deep Think	Specialized mode for science, research, and engineering.
D	DEEPSEEK	DeepSeek V4 Pro	Open-weight, 1M-token context, top-tier reasoning at a fraction of the cost.
X	XAI	Grok 4.3 Heavy	Articulates reasoning; 16-agent parallel mode for long-horizon work.
A	ANTHROPIC	Claude Opus 4.7 — Extended Thinking	Sustained chain-of-thought reasoning across long contexts.

— CURATED TOOL STACK

Your Session 1 toolkit — by use case.

Productivity & Automation

Fireflies.ai

AI meeting assistant — recording, transcription, summarization.

Gemini (Workspace)

Co-pilot inside Google apps for emails, docs, and more.

Emily

Versatile AI assistant for productivity tasks.

Research & Synthesis

Perplexity AI

Answer engine for direct, well-cited answers from the web.

NotebookLM

Personal AI tool that becomes an expert on your sources.

Data Slicing & Analysis

Numerous.ai

Spreadsheet add-on — auto data analysis, cleaning, manipulation.

Claude

Strong at insights from large documents and datasets.

Distribution & Marketing

Supergrow

Specialized AI for optimizing and scaling your LinkedIn presence.

— SESSION 1 RECAP

From understanding to **doing**.

What you locked in today

You've built the crucial first layer of your AI Generalist skill set. You've defined the future of work, established your role within it, and learned the fundamental language of AI through advanced prompting and tool exploration.

In the upcoming sessions we move from understanding to **doing** — architecting complex workflows, building autonomous agents, and designing full-stack solutions. The next chapter of this guide is the prompt library. Bookmark it. Use it.

1 The Magic Formula

Context · Task · Instruction · Data — your prompt skeleton for everything.

2 Right Model, Right Job

Match the task to the model — chat, reasoning, or multimodal.

3 Tools as Leverage

Stack specialized tools — don't try to do everything in one chat window.

— UP NEXT

The Prompt Library →

Every prompt used in Session 1, ready to copy, modify, and reuse. Organized by use case — from email crafting to data analysis to image generation.

— THE PROMPT LIBRARY

Every prompt from **Session 1.**

Copy, modify, and make these your own. These are the exact prompts demonstrated in the workshop — battle-tested and ready to deploy.

1 Magic Prompt Formula & Email Crafting

CHATGPT · CLAUDE

Email to subscribers

\$ PROMPT

Write an email to 10k subscribers inviting them to the Generative AI 2-day Mastermind by Outskill.

—

You are an experienced email copywriter who has written for brands like Ogilvy.

Write a launch email for a new workshop of Outskill on Generative AI. Write an email inviting people who have signed up for the workshop by Vaibhav Sisinty.

Make the copy over the top fun and designed to resonate with an audience of 25+ year-olds trying to figure their way around ChatGPT. Focus A LOT on users working in marketing, tech, product, and design roles and how the workshop will be helpful for them. Talk about the other interesting things that will be covered like hacks, tools, and prompt collections as bonuses.

Include a review from someone who said that the session is a no-brainer for anyone who wants to stay relevant in 2025 and beyond. It's mind-blowing.

2 Summarise a YouTube Video using AI

GEMINI

Link used: <https://youtu.be/LPZh9BOjkQs>

\$ PROMPT

Summarize this YouTube video in bullet points, highlighting the key takeaways, main topics covered, and any actionable insights. Keep it concise and structured.

Here's the video link: <https://www.youtube.com/watch?v=LPZh9BOjkQs>

3 Generate Images using AI

GROK

Image generation prompt

\$ PROMPT

Photorealistic image of Elon Musk looking super angry at Sam Altman inside a cage – both are bruised and are in the middle of a cage fight.

4 Compose & Reply to Emails using AI

GEMINI

Email reply prompt

\$ PROMPT

Compose & draft an email reply to a potential client following up on our discussion about AI-driven hiring solutions.

Keep it professional but engaging, and highlight how our solution can improve their recruitment process. Mention that I'm available for a call next week.

5 Brainstorming using DeepSeek V4

DEEPSEEK V4 · CHATGPT

Constrained brainstorming prompt

\$ PROMPT

I have ₹10,000 to invest, along with a laptop and internet access for 30 days. I want to start a home-based business that operates entirely online, without requiring me to step outside.

Please provide three business ideas, each with a detailed plan on how to grow my investment from ₹10,000 to ₹1,00,000 within 30 days.

The business should not be service-based, and since I have no coding skills, it must be achievable without writing code or using no-code tools. Additionally, the plan should not rely on running ads, as I have no experience in ad management.

6 Job Hunting using AI — 4-prompt sequence**CHATGPT****Prompt 1A · CV Summary****\$ PROMPT**

You are an expert in marketing. I would like you to review this CV and generate a summary that highlights the most impressive parts of the resume in bullet points.

Prompt 1B · LinkedIn Summary**\$ PROMPT**

Using this summary, generate a LinkedIn summary to improve my visibility and help me get a job in Growth.

Rewrite this using emojis and make it fun. Should be 600 characters long.

Prompt 1C · Tailor CV to a Job Advert**\$ PROMPT**

As my career adviser, I would like you to re-word the CV I have just given you. Please tailor it to the following job advert to maximise the chances of getting an interview. Include any keywords mentioned in the job post. Organise the structure, summary, and experience in a method you deem best for the desired outcome.

The job advert: [INSERT JOB ADVERT]

Prompt 1D · Skills Gap Table**\$ PROMPT**

I would like you to create a table with three columns.

The first column (experience required): list any desired experiences in the job advert that my CV doesn't show.

In the second column (improvement): write a suggestion as to how I will be able to acquire that particular skill with no previous knowledge.

In the third column (priority): rank the particular experience from 1 - 10 in importance for getting the desired job, where 10 is essential and 1 is not required at all.

I want the output to be a table.

**THEN — MOCK INTERVIEW****Use Gemini Voice Chat or ChatGPT Voice**

Have the AI act as your interviewer for the role and run a live mock interview to pressure-test your prep.

7 Research Intern at Your Service

PERPLEXITY

Comprehensive market research prompt

\$ PROMPT

I am interested in gaining a comprehensive understanding of the growing coffee market in India. Could you provide an in-depth analysis of the current state of the coffee market in India? Specifically, I would like to know:

1. What is the overall size and growth rate of the coffee market in India right now? Are there any notable trends or projections for the future?
2. Who are the major players in the Indian coffee market? Please include both domestic and international companies, and highlight any key differences in their strategies or market shares.
3. Is there potential for new businesses to enter the Indian coffee market? What are the barriers to entry, and what opportunities exist for new entrants?
4. What are the various channels through which coffee is sold in India? For example, how significant are retail stores, online platforms, cafes, and other distribution methods?
5. What types of coffee products are most popular among Indian consumers? Are there specific preferences for certain varieties (e.g., instant coffee, ground coffee, specialty coffee)?
6. How do cultural and regional differences within India influence coffee consumption patterns?
7. Are there any recent innovations or emerging trends in the Indian coffee market that are worth noting?
8. What are the consumer demographics for coffee in India? How do factors such as age, income level, and urban vs. rural location impact coffee consumption?
9. How does the Indian coffee market compare to other major coffee markets globally in terms of growth, consumer preferences, and competitive landscape?

8 Excel Pro using AI — Sentiment Classification

NUMEROUS.AI

Spreadsheet sentiment prompt

\$ PROMPT

Analyze the overall customer review and classify its sentiment as Positive, Neutral, or Negative.

Database: docs.google.com/spreadsheets/d/1CNksRrUjL9j-IljKAKSb1w8OKHZO8KLIRGeie4hOXFY

9 Data Analysis using AI — From a CSV file

CHATGPT · CLAUDE

Dataset: Netflix Userbase (Kaggle) · kaggle.com/datasets/arnavsmayan/netflix-userbase-dataset

\$ PROMPT

Go through the data and give me 5 insights that I can present to my boss for my upcoming marketing meeting so that he gets impressed by me and promotes me in the coming appraisal cycle.

10 Image Analysis using AI — From a Dashboard

CHATGPT · CLAUDE

Drop a dashboard screenshot, then ask:

\$ PROMPT

Give me the top 5 insights from this image.

11 Music Generation using AI

SUNO

Music generation prompt

\$ PROMPT

Create a calm lo-fi chill track with smooth beats, mellow piano, and relaxing background sounds. The theme should help people focus and unwind while studying.

— MASTER INDEX

All tools, **all links.**

Every tool referenced in Session 1, with quick-access OutSkill links. Bookmark this page — you'll come back to it.

TOOL	CATEGORY	LINK
Whispr Flow	Voice / Productivity	outskill.link/wisprflow
